

Treemobile Plant Selection Guide Spring 2015

Growing Resilience Together

Prices include mulch, compost, fungi inoculant for trees, website and operating costs. A minimal percentage has been added to enable Treemobile to donate extra plants to community orchards. All work is done by cheerful volunteers - feel free to be one! It's a great way to spend a spring morning. Proceeds, if any, are donated to Transition Guelph & Transition Toronto.

In order to keep costs down, a nominal fee will be charged for delivery. Please note that **deliveries are within the delivery zones only** (zone map to be posted separately). If you are from outside of the delivery zone, you are welcome to pick up your order at one of our distribution centres, which you can specify when ordering.

Treemobile is not responsible for damages to any services or property. Please call Ontario One Call 1-800-400-2255 to have your locates done before digging, especially for front yards.

Plants are not guaranteed. Please take good care of your plants and water them as per instructions so that you may have delicious fruit for years to come. Refer to the Orchard People website <http://www.orchardpeople.com/> for care and watering, download their free manual, and/or purchase the online tree care book.

Thanks for your interest in Treemobile!

SP= self-pollinating
 PP = pollinator preferred for greater yield
 PR = pollinator required

BR = bare root
 x gallon = pot size
 x MM = trunk size in mm.

Description	Poll.	Pollinator Partner	Ripens	Siting	Approx. Purchase Size	Approx. Mature Size		Price (includes tax)
						H	W	

All fruit trees semi-dwarf or as noted.
 Rootstock info given if known

Some plants require another variety for **pollination**. If there is another tree of the same variety within 100' you should be fine. If not, and you don't have space for two trees, maybe your neighbour can buy one and you can share the bounty!

FOR ALL FRUIT TREES: Full sun, protected from wind with good air circulation. East exposure helps to dry dew. Avoid bottom of hills (frost pockets) or hilltops unless protected by windbreak or building. Plant where falling fruit will not be an issue, nor under wires or over services. Many fruit plants can be an ornamental part of your landscape design.

FRUIT TREES

APPLE 'FREEDOM' MM 106	Juicy sweet white-fleshed apple named for freedom from disease. All purpose, stores well.	PR	gold sent'l, apple-crab, dolgo, sweet 16, h'crisp, n'mac, winter banana	late Sept.	see above	20MM BR	17'	12'	\$43.00
APPLE 'GOLDEN SENTINEL' EM 26 (compact, columnar)	Small elegantly compact columnar tree, great for tight spots. Fruit is produced on spurs along the trunk, similar to Golden Delicious in flavour. Early producer. For fresh eating, pies.	PR	apple-crab, dolgo, freedom, sweet 16	early Sept.	see above	15MM BR	8-10'	2-3'	\$38.00
APPLE 'HONEYCRISP' MM 106	A popular new apple variety. Striped red/gold; crisp, sweet, mid-acid. Eat fresh or bake, stores very well. Dependable bearer, fairly resistant.	PR	freedom, sweet 16, novamac, winter banana	end Sept.	see above	20MM BR	17'	12'	\$45.00
APPLE 'IDARED' EM 7 - triploid - poor pollinators so you will need three apples for general pollination; but triploids are very disease resistant and bear when others may not.	Red fruit, tangy, mid-sweet. Eat fresh or bake, stores well. Dependable bearer; some fruited in 2013 in spite of spring frosts. Tip bearer, smaller tree	PR	gold sent'l, apple-crab, dolgo, freedom, sweet 16	mid/late Oct.	see above	15MM BR	15'	10'	\$40.00
APPLE 'LIBERTY' MM 106 - triploid - poor pollinators see notes on Ida Red	Bright red apples with sweet creamy flesh. One of the most disease resistant. Eat fresh or cook.	PR	gold sent'l, apple-crab, dolgo, freedom, sweet 16	mid-Oct.	see above	20MM BR	17'	12'	\$40.00
APPLE 'NOVAMAC' SEMI DWRF	McIntosh type, but sweeter, disease resistant. Eat fresh or cook.	PR	freedom, sweet 16, h'crisp, winter banana	early Sept.	see above	10 MM BR	17'	12'	\$43.00
APPLE 'SWEET SIXTEEN' MM 106	Large firm crisp red-striped fruit, complex flavour. Eat, cook, bake; keeps well. Later blooming, may help avoid frost loss. Thin fruit early to retain annual crop.	PR	gold sent'l, apple-crab, dolgo, freedom, h'crisp, n'mac, winter banana	mid-Sept.	see above	20MM BR	17'	12'	\$43.00
APPLE 'WINTER BANANA' SEMI DWRF	Yellow-red heritage apple, sweet and tangy with a hint of banana scent. Fresh eating.	PR	freedom, sweet 16, h'crisp, novamac	early Oct.	see above	10 MM BR	17'	12'	\$43.00

FRUIT & NUT SHRUBS

PERSIMMON (Diospyros virginiana)	Native exotic-looking tree of the Ebony family; very sweet orange coloured fruits that hang on till November. Fruits in 7 or 8 years if both male and female plants present. Rare plant; very slow to leaf out and fruit; for the patient grower! Beautiful and unusual.	PR	male/female	Oct/Nov.	sun; keep away from salt spray	16-20" BR	35'	20'	\$40.00
PAWPAW (Asimina triloba)	Native; creamy date/banana/mango flavoured fruits not seen in stores because fruit must be eaten when fully ripe and just picked. 7 or 8 years to fruit. Tropical looking tree. Rare. Keep well mulched. Needs part shade when young.	PR	other pawpaw	early fall	dappled shade, moist well-drained soil; keep away from salt spray	14-20" BR	30'	20'	\$42.00
HAZELNUT/FILBERT (Corylus) 2 varieties for pollination	Delicious nuts full of protein, shells are a good source of heat as fuel. Fruits in about 4 yrs. Pollinated by wind, not bees. Cultivars have been bred for blight resistance.	PR	other hazel	fall	sun, well-drained soil, keep away from salt spray	14-24" BR	20-25'	15'	\$27.00
CURRENT 'RED LAKE' *sold in bundles of 3 (2 red, 1 black)*	Tart red fruit for salads, jellies, drying. Easy to grow. Fits into shrub border, prune to desired height.	SP		mid July	sun, part shade	BR	3-4'	3'	bndl of 3 \$25
CURRENT 'WELLINGTON' *sold w red lake in currant bundle*	Soft black berry for jellies, drying. Easy to grow. Fits into shrub border, prune to desired height.	SP		mid July	sun, part shade	BR	3-4'	3'	see above
GOOSEBERRY 'PIXWELL' *sold in bundles of 2*	Greenish fruit for jelly, mincemeat, chutney. Flavour changes when ripens to purple. Slightly thorny, easy to grow. Walnut & shade tolerant.	SP		July-August	sun or part shade	BR	3'	2-3'	budl of 2 \$16
GOJI BERRY 'FIRECRACKER'	Grow your own health food! Lavender flowers in summer; dark orange fruits dangle like jewels. Bittersweet, tangy fruits in fall for drying or shakes. More fruit if more than one planted. Easy to grow. Should be pruned to control size after first year; apparently shoots are edible.	PP	other goji	late August, fruits hang on till frost	sunny to fairly sunny, well-drained soil	2 GALLON	6'	5'	\$29.00
HASKAP 'CINDERELLA'	Good yields for fresh eating, jam. Medium size tubular blue berry. Easy to grow. Attracts birds.	PR	Borealis, Berry Blue; will pollinate up to 5 Borealis	July	sun, any soil	2 GALLON	3-4'	3-4'	\$25.00
HASKAP 'BOREALIS'	Long sweet berry, tasty blueberry/ raspberry flavour; high in anti-oxidants. Fresh, jam, wine. Easy to grow, ornamental, attracts birds.	PR	Cinderella, Berry Blue	July	sun, any soil	2 GALLON	4-5'	4-5'	\$25.00
ELDERBERRY 'Victoria'	Small black fruit for jellies, pies, wine; high in Vit. C. Ornamental value as well. Plant at least 2 for pollination. Cut out weak stems in spring. Easy to grow.	PR	other elderberry	Aug/Sept	sunny to fairly sunny	2 GALLON	8'	6'	\$16.00
