

Treemobile Plant Selection Guide Spring 2020

Growing Resilience Together

Prices include fungi inoculant for trees, website and operating costs. A minimal percentage has been added to enable Treemobile to donate extra plants to community orchards. All work is done by cheerful volunteers - sign up if you'd like to help. Proceeds, if any, are donated to Transition Guelph, Transition Toronto, and our wonderful host sites

In order to keep costs down, a nominal fee will be charged for delivery. Please note that **deliveries are within the delivery zones only** (zone map posted separately). If you are from outside of the delivery zone, you are welcome to pick up your order at one of our distribution centres, which you can specify when ordering.

Treemobile is not responsible for damages to any services or property. Please call Ontario One Call 1-800-400-2255 to have your locates done before digging, especially for front yards

Plants are not guaranteed. Please take good care of your plants and water them as per instructions so that you may have delicious fruit for years to come. Refer to the Orchard People website <http://www.orchardpeople.com/> for care and watering, download their free manual, and/or purchase the online tree care book.

Thanks for your interest in Treemobile!

All fruit trees semi-dwarf or as noted. Rootstock info given if known. Zone refers to climate hardiness; eg. Toronto is Zone 2 to 6, Guelph is Zone 2 - 5.								
Some plants require another variety for pollination. If there is another tree of the same variety & bloom time within 150' you should be fine. If not, and you don't have space for two trees, a neighbour can buy one and you can share the bounty!								
FOR ALL FRUIT TREES: Full sun, protected from wind with good air circulation. East exposure helps to dry dew. Avoid bottom of hills (frost pockets) or hilltops unless protected by windbreak or building. Plant where falling fruit will not be an issue, nor under wires or over services. Fruit plants can be an ornamental part of your landscape design.								

Pome Fruit Trees

APPLE 'EMPIRE' Zone 4 *NEW*	MacIntosh type, tender semi-sweet medium sized red blushed fruit, Resistant to mildew and blight. Fresh eating, sauce, pies.	PR	Spartan, Dolgo, Gold Russet, Honeycrisp, Liberty, Scarlet Sentinel; (mid-season bloom)	October	see above	20mm BR 6-7'	15'	10'	\$47.00
APPLE 'GOLDEN RUSSET' Zone 5 *NEW*	Fine grained crunchy yellow apple with tart taste, golden-brown skin. An older apple; Anne of Green Gables enjoyed them. Disease resistant. For cider, eat fresh, baking; stores fairly well.	PR	Spartan, Dolgo, Empire, Honeycrisp, Liberty, Scarlet Sentinel; (mid-season bloom)	November	see above	15mm BR 5-6'	15'	10'	\$45.00
APPLE 'HONEYCRISP' Zone 3	A popular new apple variety. Striped red/gold; crisp, sweet, mid-acid. Eat fresh or bake, stores very well. Dependable bearer, fairly resistant.	PR	Empire, Gold Russet, Liberty, Scarlet Sentinel; (late season bloom)	end Sept.	see above	20mm BR 6-7'	17'	12'	\$47.00
APPLE 'LIBERTY' Zone 4	Medium red apple with crisp juicy yellow flesh for fresh eating or applesauce. Easiest apple to grow organically, very resistant to scab, rust, blight.	PR	Spartan, Dolgo, Empire, Gold Russet, Liberty, Scarlet Sentinel; (mid-season bloom)	early Sept	see above	20mm BR 7-8"	15'	11'	\$47.00
APPLE 'SCARLET SENTINEL' Zone 5	Dwarf columnar tree for small spots and city lots. Red-blushed fruit is crisp and sweet, produced on spurs along the trunk. Early producer for fresh eating, pies.	PR	Spartan, Dolgo, Empire, Gold Russet, Honeycrisp, Liberty; (mid-season bloom)	early Sept.	see above	20mm BR 5-6'	8-10'	2-3'	\$47.00
APPLE 'SPARTAN' M.M.106 Zone 3	Small sweet crisp & juicy red apples for fresh eating. Hardy and resistant tree, dependable bearer with few problems	PR	Gold or Scarlet Sentinel, Empire, Gold Russet, Dolgo, Liberty (early bloom)	October	see above	20mm BR 7-9'	17'	12'	\$45.00
CRABAPPLE 'DOLGO' (FRTING) Zone 3	Large pretty bright red crabapples make delicious jellies and chutneys, highly ornamental in both fruit and flower. Low maintenance.	PR	Spartan, Liberty, other crabapples (early bloom)	mid-August	see above	20mm BR 7-9'	15'	11'	\$45.00
PEAR 'BARTLETT' Zone 5	Classic yellow pear, rich and buttery. Eat, can; good producer. Pears are easier to grow than apples.	PR	other pear variety	mid-Sept.	see above	15mm BR 6-8'	25'	12'	\$49.00
PEAR 'BOSC' Zone 5	Tan coloured elegant French pear for dessert, cooking, keeps well. Holds shape so best for poaching, canning. Hardy and slower growing.	PR	other pear variety	early Oct.	see above	15mm BR 6-8'	25'	12'	\$49.00
PEAR 'LUSCIOUS' Zone 5	Juicy sweet small pears for fresh eating, not recommended for canning. Yellow fruit with rosy blush. Hardy & blight resistant	PP	other pear variety	Sept	see above	15mm BR 6-8'	17'	12'	\$47.00
ASIAN PEAR 'CHOJURO' Zone 4	Russet colour, juicy, aromatic and crisp, stores well. Few diseases, fruit tends to hang on tree till picked. Fresh eating or keeping.	SP/PP	bartlett, other Asian	late Aug.	see above	20mm BR 7-9'	15'	10'	\$49.00
ASIAN PEAR 'SHINSEIKI' Zone 4	Yellow green, juicy and crisp, stores for months. Few diseases, fruit tends to hang on tree till picked. Eat fresh or store for winter eating	SP/PP	bartlett, other Asian	early Sept.	see above	20mm BR 7-9'	15'	12'	\$49.00

Stone Fruit Trees and Shrubs
